

Supporting long-term stability for

with APPLICATION MANAGED SERVICES

Your long-term business plans depend on consistency and stability within your WorkForce Software solution. You need to be sure that functionality remains optimal, regardless of changes to the solution or your business documents.

Here's why you need to talk to a **GroupeX Solutions** consultant about Application Managed Services (AMS) for WorkForce Software.

Why AMS?

Requirement Changes

Provide solution updates for operational and functional components. For example:

- New pay codes
- Pay rule changes
- Interfaces to third-party system

Enhancements

Implement new functionality in your solution. For example:

- Acquisitions
- New unions
- Advanced scheduling

Maintenance and Support

Investigate, fix and deploy solutions for production defects. For example:

- Application error fixes
- Pay rule fixes
- Interface updates
